HARRISON
AVENUE

The new Congregational parsonage is almost completed and Rev. Atkinson and family will move in Monday.

Services are being held at the Congregational church this afternoon preparatory to communion services Sunday.

Payne in more pain. Friend P. B. is in very much distress these days, while carrying one of those large sized Job's comforters on his left jaw. He says it is no comfort to him.

Word has been received from E. C. Merrill who is visiting his sister in Philadelphia. He stated that the weather is quite chilly there. He goes from there to St. Paul, Minn., on his way toward home.

Mrs. G. R. Camp nee Gertrude Ayers has been a guest at the C. H. Whitman home. Lieut. Camp who is at present in a hospital in Philadelphia will join his family at San Francisco as soon as he is able to travel.

Gilmore Duncan formerly of Campbell, now a prosperous dairyman of Modesto is here today the guest of his relatives. Mr. Duncan says he is not troubled by the heat which he thinks is not at all excessive.

The Safe Vault & Protection Co. of Los Angeles is installing a new improved burglar alarm which will apprise the citizens of any attempt to get their cash from the bank by illegal process. Always do your business by check and keep that alarm quiet.

Mrs. Sadler and the Misses Palmer left Monday for a short visit with relatives in Oakland. Shortly after their return the Misses Palmer will start for their old home at Pomona. They plan to return to Mt. Hermon to spend their summers at their cottage.

T. J. Henderson and family of Hamilton Avenue toured through the bay counties in their French Touring Car the latter part of last week accompanied by Mr. W. S. McDevitt of San Francisco. They spent Sunday in San Francisco taking in the World's Fair sights.

At a union meeting of the churches Sunday evening Rev. Davison gave a very interesting lecture on a set of picture slides of Japan. Mr. Davison having been a missionary in the Orient for some years was able to give many little personal observations which added to the interest of the talk.

E. E. Weeks, who recently purchased a lot on 4th Street south from Mr. Strum, is erecting a house 26x48. The concrete foundation is set and the sills are already laid. Mr. Weeks' location is west front and has one of the finest views in the village. Mr. Strum has sold several other lots in that part of his tract.

Mesdames M. E. and A. A. Purmort and S. G. Nelson will entertain the Pictoria Circle at the house of Mrs. A. A. Purmort, on Sunny Oaks avenue, Wednesday afternoon in honor of the Misses Palmer, who expect to leave for their home about the 15th. This being the first regular meeting of the Circle this year a short business session will be held.

Little Matthew Burns while playing on the lawn near the library Monday afternoon cut a severe gash in his right leg. He, with several other boys, was jumping over the hydrant from which the handle had been taken. The sharp end of the hose cut the flesh for about six inches. Dr. Merrill was summoned and took several stitches in the wound which is doing nicely now.

On Oct. 20 the Methodist Sunday School will invite all new comers and strangers in the vicinity to attend the rally day service given at the Sunday School rooms at 9:45 sharp. Come one, come all and give the school a visit. We need growing timber in order to make material for the big chairs of our land. It is the well trained boy and girl who makes the timber man or woman. Come and let us talk it over on the 20th.

Rev. J. F. Wilson gave a very interesting lecture before the Countryman's Club, Tuesday evening. His subject, "The Malay and Malay Lands" was dealt with in a way that can only be done by one who has been there, and Mr. Wilson was in his best story telling mood, relating many personal experiences and observations. At the next meeting Oct. 15, Mr. Wilson will continue his discourse, and every member should be there to hear it.

Dr. T. L. Blanchard to Europe

Dr. T. L. Blanchard of San Jose and Campbell will leave Tuesday for Europe where he will spend six months taking post-graduate work in medicine and surgery. He will enter in active work at London hospital and later visit the famous German and French Medical Centers.

This opportunity of getting advanced work has long been the plan of the doctor and his friends will be pleased to hear of the realization of his plan. Saturday evening at Hotel Vendome the Medical fraternity of San Jose will give a farewell reception and dinner in honor of the doctor. During Doctor's absence his calls will be made by Dr. Beattie of Santa Clara.

Notice of Institute

To the Teachers of Santa Clara County:

LADIES AND GENTLEMEN:—The Santa Clara County Teachers' Annual Institute is hereby called to meet in Normal school, Old Hall, in the city of San Jose, on October 7th, 8th, 9th, 10th and 11th. We will begin at 1:30 p.m. sharp, on Monday, October 7th, and close at 12 o'clock sharp, Friday, October 11th. The whole forenoon of Friday is to be devoted to athletic exercises.

All the children of the county are cordially invited to attend. Please make the announcement in your schools.

Principals will please hand a copy of this notice to each assistant teacher. Teachers will find attendance cards on the desk, also with the secretary, Mr. Robert Down.

Teachers who fail to attend the Institute for the full time are not entitled to pay for same, even if excused by the County Board.

Teachers who attend institute regularly are entitled to their pay whether school is in session at that time or not.

Trustees will be notified of attendance of teachers at institute.

Under the law, neither a Board of Trustees, a Principal, nor a Superintendent has any authority to excuse a teacher from attending institute. The Superintendent must report to the County Board of Education the name of every teacher who does not attend the full sessions of the Institute regularly, and it must deal with the absentees.

All persons interested in education are cordially invited to attend institute.

Cordially yours,

D. T. Bateman,
County Supt. of Schools.

Proposed Lecture Course

The possibility of a Lecture Course to be given in Campbell this winter is being agitated and the promoters are trying to obtain the general consensus of opinion, and the financial support which can be counted upon.

The course, as proposed, consists of five numbers; one not determined as yet. The five entertainments would be scattered thru the coming winter and would give to the citizens of Campbell and vicinity a high class of amusement and instruction. Tickets would be sold at reduced rates for the series, or by individual numbers.

The following have been proposed for the series.

(1) B. R. Bailegard, lecturer, who has a series of illustrated lectures bearing upon the history of human civilization—i. e., Pompeii, City of the Dead; Westminster Abbey; An Evening with the Stars, etc.

(2) Skovgaard Concert Party consisting of Skovgaard, The famous Danish Violinist, Miss May Warner, Soprano, and Miss Alice McClung, Pianiste.

(3) "The Wanderers," (a) Hugh Walter Sparks, Cartoonist, Humorist, Entertainer; (b) Talma—Zetia Wilbur, Reader.

(4) Fred Emerson Brooks, Poet, Humorist and famous Orator.

(5) This number is still in doubt but if the course can be arranged, will probably be the famous Knickerbocker Quartet of San Francisco.

Such a series of entertainments would be of great value and should receive a good word and promise of support so far as possible from every one.

New Packing House

The new packing house of the Campbell Farmers' Union Packing Co. has been receiving fruit this week at a pace never before equalled in the history of the Company. The new grader with a capacity of 70 tons per day has been working overtime to take care of the fruit that was held for the completion of the house. The processor is of the latest type and will greatly facilitate the work. In fact, everything is so arranged that fruit may be handled rapidly. Saturday is open house and many visitors will see the working of all machinery. In the evening an entertainment will be given by the company at 1. O. O. F. Hall after which refreshments will be served.

The directors are: P. B. Payne, F. G. Currier, H. P. Fairfield, Fred Millard, W. O. Post, P. D. Gardner, F. M. Righter, H. Pash, and H. E. Brandenberg. P. B. Payne is president and F. A. Ernst Secretary.

Home and School Club

The Home and School Club held its first meeting for the school year at the Campbell Grammar School, Tuesday, Oct. 1. The members passed a pleasant afternoon arranging for the work of the coming year.

The Committee on Moral Training, Mrs. C. H. Whitman, chairman, will entertain the club at its next meeting, Oct. 22. Mothers, fathers, every body interested in the Home and the School are cordially invited to be present.

EFFECT PRECEDES THE CAUSE

Clever Edinburgh Clergyman Meets His Match in Examining Student on Classes Attended.

The Rev. Dr. Ritchie, of Edinburgh, although a very clever man, once met his match. When examining a student as to the classes he attended he said:

"I understand you attend the class for mathematics."

"Yes."

"How many sides has a circle?"

"Two," said the student.

"Indeed! What are they?"

What a laugh in the court the student's answer produced when he said, promptly:

"An inside and an outside."

The doctor next asked:

"And you attend the moral philosophy class also?"

"Yes."

"Well, you doubtless heard lectures on various subjects. Did you ever hear one on cause and effect?"

"Yes."

"Does an effect ever go before a cause?"

"Yes."

"Give me an instance."

"A barrow wheeled by a man."

The doctor hastily sat down and proposed no more questions.—San Francisco Herald.

Too Bad.

"So your brother Bill is dead? I'm mighty sorry to hear it, old man. How long had he been sick?"

"Only about a week. But we always kind of expected Bill to go sudden."

"And when is the funeral?"

"This afternoon."

"Well, well! It's too bad."

"Yes. The cubs and giants are going to play a double-header."

CONVENIENT IGNORANCE.

"How can you tell whether your automobile is going faster than the law allows or not?"

"I can't tell. That's one of the beauties of it."

A Familiar Legend.

"I ought to have some legends connected with the place," said the landlord. "They bring trade, legends do. There needn't necessarily be any truth in them, you know."

"Stick to the legend that you are running a first-class hotel," advised the guest. "That legend will catch a few suckers every year."

Horrors of Journalism.

"Here's an item," observed Rivers, who was looking over the exchanges, "to the effect that the king of Sweden raises prize dogs on his farm."

"I suppose he uses them," suggested Brooks, "to drive his Stockholm."

After which the rattle of the typewriters broke out afresh with great violence.

Style Card Limitations.

Regstaff—Have had to borrow some money, have you? Well, you're a short story writer, all right.

Percollum (with some bitterness)—Yes—and I can't use that one, either; they'd never let me stick a hyphen between 'story' and 'writer!'

No Help for It.

The Dorkins family had spent a month at a summer resort.

"John," said Mrs. Dorkins, with every indication of profound sorrow, "we'll have to stay here another month. Here's a letter from Mrs. Jipes, and she says they've just oiled the street in front of our house."

In the Railway Mail Car.

"Here's a letter directed to Golf. Is there any such station?"

"Yes; there's one in Illinois, one in Ohio, and I think one in—"

"But this is addressed to Golf, Wis."

"O, that's easy; send it to La Crosse."

Entertaining Him.

"Mr. Spooner, I think I like you better than any of the other fellows that come to our house."

"Why so, Bobby?"

"Cause when you give sister a box of candy she always turns it over to me."

A Rare Event.

"I met Spenders just now."

"Yes."

"He told me he was on his way down town to pay a bill."

"Ah! Do you suppose the moving picture rights would be worth anything?"

GOOD ROADS

MILEAGE OF IMPROVED ROADS

Indiana Leads All States of Union, With Ohio a Close Second—Mostly Composed of Gravel.

According to information just made public by the director of the office of public roads, Indiana leads all the states of the Union in mileage of improved roads. Most of the improved roads of Indiana and Ohio are composed of gravel and were, for the most part, built by the farmers in working out taxes. In many cases the gravel is dumped on the road without proper spreading or rolling. Roads constructed in this way seldom give entire satisfaction.

The eight leading good roads states, as shown by the data compiled by the director, are as follows:

	Mileage Improved 1904	1905
Indiana	23,877	24,955
Ohio	23,460	24,106
New York	5,576	12,787
Wisconsin	10,633	10,167
Kentucky	9,486	10,114
Illinois	7,924	8,914
California	8,803	8,587
Massachusetts	7,843	8,463

Where decreases are shown, they have been the result of reclassification of roads.

Strangely enough, New York is the only one of the eight that appears in the list of the eleven states leading in actual progress in road building in the five-year period. In other words, while the entire eight states maintain their lead, it is merely because of their earlier start, and New York alone is entitled to a place in the list of states in progress in the last five years. The states which are leading in progressive road building are New York, Georgia, Washington, Missouri, South Carolina, Alabama, Pennsylvania, Tennessee, New Jersey, Florida and Maryland.

The gain in New York, according to the director of the office of public roads, is due largely to the fact that the state has bonded itself for \$50,000,000, and that \$5,000,000 a year more is being expended by the state, in addition to an equal sum by the counties, in building state highways. New York is leading all the states in actual progress at the present time, and if the pace is maintained she will take the lead over Indiana and Ohio in actual mileage in a few years.

BEST PLACE FOR TOOL HOUSE

North Side of Barn Is Favored on Account of Coolness and Less Needed for Stock.

The north side of a barn is in many ways the best place to house implements, for it is cooler to work in and less needed to shelter the stock than the south side. An iron roof not in every way suited to stock will answer the purpose, and is cheap. One of the main difficulties in shedding tools is to be able to get at them as needed. The drill is often needed, fall as well as spring, and a lot of tools have to be moved to get at it, and other tools are often hard to reach.

Perhaps a square house with a driveway through the middle and plenty of rolling outside doors is the most convenient, for in that case each tool can be moved out directly.

Doors are not so very much more expensive than the sides of the building, and they can be made tight enough for the machinery which is not affected by drafts. If the shed is not convenient the machinery will be outside a great part of the time. I do not believe it is practical to shed all the wagons in this climate—they must be out so much anyhow that the protection of good paint which they carry with them will be more effective than shedding part of the time, except with wagons used for hauling which are not in use through the summer.

Guinea as a Forager.

The guinea fowl is a great forager and destroys many insects that the hens will not touch. They do not scratch the garden and, though not easily kept near the house, they make known the places where they lay by a peculiar noise, which enables one accustomed to them to find all the eggs they lay. They really cost almost nothing to raise, and when roosting near the house create an alarm should intruders make their appearance.

Pig Feeding Made Easier.

Set the pig trough close up against the fence and nail a board to the inner side of trough so it will protect trough between the fence boards. When feeding pour the slop on the board from the opposite side and there need be no trouble in keeping the hogs away until the slop is in the trough as under the customary way of doing.

Plants for Poultry Yard.

If your poultry yard has not already some shrubs or trees, plant some for shelter for the fowls on hot days. It is well to have two yards, and sow one with grass while they are living in the other.

BEST ARRANGEMENT OF COIFFURE

SOME styles of hair dressing are not suited to dark shades of hair, but are especially effective for blondes. Those whose hair is in the lighter red shades, in gold or pale drab shades, and especially the ash blondes, may pick out fluffy and elaborate coiffures which are suited to their individual style.

An unusual coiffure is shown here worn by a model with pale gold hair. The very white skin and dark eyes perhaps lend a charm to this hair dress. It shows a return to many thin, fluffy puffs covering the back of the head and curled fringe across the forehead. This fringe is curled in little ringlets on a small iron and

they are the new and individual feature of this style. Not everyone can wear them.

All the hair is waved for this hair dress and the puffs are quite liberally pinned on. That would at any rate be the most convenient way in which to wear them. They are too light and fluffy to burden or heat the head and as a matter of fact, much more comfortable than the natural hair is when arranged in so many puffs.

It will be noticed that the puffs are arranged very close to the head and that there is not much hair at the sides of the face as in the greater number of today's coiffures.

JULIA BOTTOMLEY.

BRILLIANCY IN SHOE COLORS

Many of the Modes Verge on the Garish, Though Remarkably Pretty Effects Are Produced.

Just as colors in hosiery have been used with discretion by the woman with a talent for dress, so have colors in our footwear. Some women have adopted gayly colored tops for their shoes with an eclect which carried them off; others have impressed us with the vulgarity of the new whim. But one and all have fallen captive to the new Colonial slipper, which was introduced along with the dashing little Directoire coats, the Continental hats, and other reminders of the Napoleonic period. It is a jaunty little affair, which is simply bewitching on the right foot, a slender little foot with a well arched instep, for it boasts a broad pointed tongue, spreading out over the instep, a high heel, on the Spanish order, and a stunning buckle—just such a buckle as the more fortunate of us have handed down for generations. We copyists of today select such a bugle in gun-metal, leather, old silver, or, if we wish to be very rash, rhinestones. Can't you see just how fascinating these slippers can be?

For evening, our satin slippers, whether in black or a color to match the gown, are brilliant with buckles of the glittering rhinestones, or cut steel. The bow knots of platinum, set with brilliants, are entrancing as adornments to a dainty satin slipper. Still another fancy calls for a button of brilliants.

SERVING THE AFTERNOON TEA

Appurtenances May Be Costly or Simple, but Everything Must Be of the Daintiest Order.

When the woman who is her own maid serves afternoon tea she appreciates the convenience of having a cart which can be wheeled from kitchen to living room and will hold everything that is needed for the collation. The carts come in mahogany or fumed oak with glass top shelves and rubber tired wheels and in natural wood with rattan, and, considering their usefulness, none are very expensive. Lacking the cart, many housekeepers have in their living room a little oak or mahogany or willow tea table equipped with a spoon drawer, which also holds several paper napkins. Instead of keeping the service upon the table its top is ordinarily covered with an elaborately embroidered silk-mat, which is whisked off when the tea equipage is brought in on a tray of the proper size. Unless this tray is a handsome affair of glass rimmed with mahogany, silver or brass, it should be covered with a fine linen tray cloth and be accompanied by a muffin stand of wood or of willow.

Space-Saving Parasols.

There is a growing fancy for parasols and umbrellas that can be easily packed. One of the newest is adjustable to any angle, which makes it convenient for motor, tennis tournaments or the races, and when closed the top disappears in the handle. This sunshade has a rosette and loop by which it can be slung over the wrist.

Folding umbrellas are now made to go in small trunks and compact enough to be tucked into a suitcase or even a satchel. An umbrella which does not fold, but weighs only twelve ounces, is of thin, strong silk on a light steel frame and stick.

BEAD TASSEL EASILY MADE

Having the Fringe and Beads, the Decoration Is by No Means Hard to Put Together.

A very simple bead tassel can be made from deep fringe or from loose beads.

If you use loose beads you must thread forty lengths of seventy beads each, or twenty lengths of a hundred and thirty beads if a double end is preferred to a single one. Each length is attached to a narrow strip of satin ribbon, which is then wound round and round and stitched through to prevent the middle of the little bundle from slipping.

If the tassel is made of fringe, cut off five inches and wrap the heading round and sew as described above. Next take a piece of stiffening one inch and a half long, two inches broad at one end and three-quarters of an inch at the other. Cover with silk and oversew the edges together so as to form a tube.

Slip the satin ribbon inside the larger aperture in the tube and stitch through securely, for the beads make the tassel very heavy. Thread about two hundred beads and wind the string round the tube to completely cover the silk, sewing at intervals. Make another string of eighty beads, double into three, and sew to the top to form a loop.

CHILD'S SUIT.

This attractive little suit is of tussah silk in natural color. The dress is made with a long-waisted blouse and short skirt, the latter finished with lace to match.

The blouse is trimmed at the top with hand-embroidered dots, and the girdle is of taffeta of a contrasting color.

The pretty jacket has a waistcoat, buttons and cravat of taffeta like the girdle.

Wrinkled Seam.

When a seam becomes wrinkled sewing on the machine, dampen slightly and press it on the right side with a warm iron, laying a piece of the same material over it and pulling the seam gently as you run the iron over it. This will shrink the material and the seam will become quite smooth.

POULTRY

KEEP POULTRY HOUSE CLEAN

Given Plenty of Good Food and Well-Kept House Hen Will Solve the Winter Egg Problem.

Experience has led me to conclude that cleanliness is a profitable virtue in poultry raising. Give the hen plenty of good food and clean quarters and she will give no occasion for worry over the winter egg problems. We who have followed the chicken business either for pleasure or profit, for pin money or income, have heard this time-old advice repeated with religious regularity every new moon, writes Dennis H. Stovall of Oregon in the Northwest Farmstead. When we give it heed, we win; when we let it pass, we lose.

Cleanliness in the henhouse and the poultry yard is a very simple thing, for the reason that it depends upon simple things. A few years ago I experimented with fancy roosts, patent drop boards, intricate nest shelves, and various other contrivances calculated to make the hen lay, and to make chicken raising easy. These have all been discarded. They entailed too much care, and involved far more labor than the simple, common sense methods. I have found nothing better for roosts than those of the sawhorse pattern. This gives a roost

Carpenter's Horse Poultry Roosts.

about three feet high, and each one long enough to accommodate at least a dozen fowls without crowding. Placed side by side, rather than one above the other, they assure perfect cleanliness. They can be easily removed from the house for cleaning and treatment with lime, emulsion or lye. With a smooth board floor this allows a chance for cleaning the henhouse perfectly; and I have found it a good plan to give the house such a cleaning twice a week.

The next boxes are also removable, so as to allow a thorough cleaning and change of straw, the old being burned.

CURE FOR DROOPY POULTRY

Dip Made of Strong Bacon Grease and Warm Water Will Cause Feathers to Drop Easily.

Save all the strong bacon grease, especially the grease from fried bacon. When your fowls sit around picking themselves and looking droopy and shabby, get a large deep can or bucket; from its shape a large candy bucket is best; fill it nearly full of warm water; on this pour melted grease until it forms a thick scum over the water; catch your fowls, take them one by one, by their wings, and with the head held straight up, dip them down, pretty hard, two or three times into the water; let the head go completely under once; do this quickly to avoid strangling the fowl; then turn it loose.

After waiting a few hours for the water to drip from the feathers, drive them into the shade, so the sun will not blister them. For a short time they will be a sorry looking lot of fowls.

This treatment causes the feathers to fall apart, so the body of the fowl is cool, the water softens the skin; the grease-laden feathers fall out easily, and the new ones push their way through the skin and grow in masses instead of one or two in a place; the time of moulting is shortened; the fatty grease kills all vermin on the fowl, while the grease-saturated feathers are death traps to any vermin that may get on them.

Keep the bucket filled with water and pour more grease on the water from time to time.

The fowls should be dipped early in the morning and made to roost under shelter for several nights.

By dipping fowls in the early fall they become healthy and free from pests, hence stand the winter better, and in the spring have little or no vermin to annoy them and get on and kill their little ones.

Killed by Kindness.

More brooder chicks are killed by kindness than die of any other complaint. A chick that is a little hungry will take exercise sufficient to keep in good health. Make your ration for chicks about one-third cracked cane seed, and you will not have much bowel trouble, and sprinkle the floor of the brooder with good clean sand every day or two.

Vermin in Hot Weather.

Vermin breeds much faster in warm weather than in cool weather. Often give the henhouses, brooders and brood coops a thorough disinfecting with some good liquid disinfectant and dust the fowls and chicks well with lice powder.

WATERING TANK FOR FOWLS

Chicago Man Constructs One With Automatic Opening and Closing Valve for Supply.

From a tank placed on a bracket shelf near the ceiling of my chicken house I ran a one-half-inch pipe down and into the water dish, writes P. D. Merrill of Chicago in the Popular Mechanics. I then made a float of a tin can and attached it to the end of a lever with the float resting in the dish in such a position that an increase of the amount of water would cause the float to rise and produce a downward motion of the opposite end of the lever. To this end I attached a cord which extended to a lever above the water tank, operating a

Automatic Opening and Closing Valve on a Supply Water Tank for Fowls.

cock valve at the top of the feed pipe as shown in the illustration.

A coil spring holds the valve open when the water in the watering dish is low and allows the water to flow in until the float rises, which closes the valve and shuts off the flow until the water is again lowered in the dish.

MAKING LATE HATCHES PAY

Cockerels Will Grow Rapidly and Come in Nicely for Winter "Springers" for Frying.

Midsummer chicks are as a rule not a success. The main reasons are that the hot weather and insects are against them. But late hatches will frequently do as well as early ones with equally good care. For late hatches set hens or the incubator any time in August, to have the chicks come off in September, when the weather is cooler and the summer insects have begun to diminish.

Cockerels from early fall hatches will grow rapidly and will come in nicely for winter "springers" for broiling or frying. Pullets from these hatches may not grow to be so large as spring-hatched pullets, nor will they lay this coming winter, but they will begin to lay next spring, and will continue to lay all next summer at a time when other hens are off duty in the egg business. With a good number of fall-hatched pullets a continuous egg supply for all the seasons is assured.

BROODER HOUSE MADE HANDY

Convenient Coop for Poultry Keeper Can Be Made Any Size Desired—Cover With Netting.

The illustration shows a very convenient style of coop for the poultry keeper. It can be made any size desired, from 2x3 to 4x5 feet or more, says the Farm and Home. The smaller coop is sufficient for a hen and her brood, while the larger size

Brooder Colony House.

will hold a brooder and accommodate a flock of 100 chicks.

The yard should be made in three sections of 1x2 or 1x3 inch strips covered with one-inch mesh wire netting. If covered over the top with wire netting, it will be proof against cats and other intruders. The coop and house should be moved to fresh ground weekly.

POULTRY NOTES

Molting season is at hand. Pullets hatched in March should be laying now.

Vermin breeds much faster in warm weather than in cool.

Fifth and vermin are the great profit killers and yet good remedies are in reach of everyone.

Hens set in August will produce chicks that will grow into first-class table poultry about February.

If our chicks or older fowls are not thrifty, let us look into our methods and find out where we are to blame.

When the hens begin to climb trees to roost, it is time to look to the ventilation and cleanliness of the houses.

Hen afflicted with scaly leg cannot possibly give the best service in egg production, and rough shanks look bad.

Do not use harsh methods in breaking up the broody hens. Remember that broodiness is nature's provision for rest.

Authorities claim that the eggs from a hen will be fertile for ten days after the removal of the male from the flock.

The appearance of the fowls is not very attractive now, but when the molting ordeal is over they will look all the prettier.

Two essentials are absolutely necessary to raise summer-hatched chicks: First, an abundance of fresh air; second, protection from the heat of the sun.

Coughs and Colds

You could not please us better than to ask your doctor about Ayer's Cherry Pectoral for coughs, colds, croup, bronchitis. Thousands of families always keep it in the house. The approval of their physician and the experience of many years have given them great confidence in this standard cough medicine. Sold for seventy years.

Any good doctor will tell you that a medicine like Ayer's Cherry Pectoral cannot do its best work if the bowels are constipated. Ask your doctor if he knows anything better than Ayer's Pills for correcting this sluggishness of the liver.

Made by the J. C. AYER CO., Lowell, Mass.

Got Back at the Judge.

A celebrated engineer, being examined at a trial where both the judge and counsel tried in vain to browbeat him, made use in his evidence of the expression, "the creative power of a mechanic," on which the judge rather tartly asked him what he meant by "the creative power of a mechanic."

"Why, my lord," said the engineer, "I mean that power which enables a man to convert a goat's tail into a judge's wig."

Saving the Babies.

In England and some other countries great progress has been made in recent years in the prevention of infant mortality. In this country an association has been formed, known as the American Association for the Study and Prevention of Infant Mortality. The object of this society is to coordinate all the sanitary agencies for the express purpose of reducing the number of preventable deaths of babies.

For the Poor Alone.

The present is for the rich, the future for the poor.

Novel Boudoir Clock.

Among curious clock novelties is the shadow boudoir clock. With it there is no need of getting up to strike a light or turn on the bulb. All that is necessary is to touch a button and the time is flashed on the wall, after the same fashion that signs are flashed on the sidewalk. When the owner of the clock retires he turns a night dial to the ceiling and when he presses a bulb the electric light reflects from the dial through the lens and appears, giving the correct time in shadow on the ceiling.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Arsenic From Many Sources.

Arsenic has been found as a normal constituent in man and animals and now Jadin and Astrug, two French biologists, show that it may be derived from edible plants and fruits. They examined 39 vegetable substances, and obtained arsenic from all, the quantities ranging from 0.03 part per million in the leaf to 0.25 part per million in almonds and beans.

Pettitt's Eye Salve

FOR ALL SORE EYES

Something Cruel About It.

Benevolent Party — "Don't you think fishing is a very cruel sport?" Angler—"Cruel? Well, I should say so. I've sat here three days and not had a bite, been nearly eaten up by gnats and stung by two wasps, lost my pocket-knife in the river, and the sun has taken all the skin off the back of my neck."

"A Confession of Faith"

If you have trouble with your Stomach, Liver or Bowels, feel run-down and in need of a tonic, we urge a trial of

HOSTETTER'S STOMACH BITTERS

Your faith in this medicine will not be misplaced. It will surely help you. Be convinced today. All Drug-gists and Dealers.

Best Cough Syrup. Tastes Good. Use in time. Sold by Druggists.

FOR COUGHS AND COLDS

"CECIL OF WOODS"

A Snowbound Nightingale Sings by Wire.

By EDGAR WHITE.

The snow had fallen steadily all the day, weaving garments of white for the undulating earth. As twilight came on the little train, in spite of the tremendous puffing of its engine, settled down to a walk. Men of the crew rushed backward and forward through the aisles, looking anxious. The country seemed a wilderness; deep ravines, dense forests, frowning cliffs and rugged mountains.

The lamps were lighted and "The Faust Opera" troupers in the rear coach began to sing. All day their spirits had fallen with the snow. A failure to reach the junction meant Christmas Day in the wilds, a most distressing thing after the eagerly looked-for reunion with the folks at home. So they tried to sing the blues away. But it was no use. The songs died mournfully. Suddenly the engine stopped. A brakeman, lantern in hand, entered from the rear.

"Where are we?" asked the tall thin manager of the show company. "Frog Island Crossing," said the brakeman tersely. "The road's blocked."

Idly they watched the brakeman and another man working outside with a line to connect the telephone wire with an instrument in the car. This meant they were going to call up the nearest telegraph office so the man there might notify the superintendent to send the snow plow and men; relief was far away.

It was ascertained that the nearest help was seventy miles down the line, and that the snow-plows could hardly hope to reach the train before morning. As it was still snowing heavily even this calculation might be overly optimistic.

The conductor found a farm house, and returned with baskets of delicious turkey, chicken, light bread and preserves. There were tankards of coffee, and cans of real cream. How the old world troubles fell under the gracious influence of that homely country fare foraged out of the storm. And how the actors ate! It was a repast unsurpassed along the length and breadth of the Great White Way. Song birds chatted and laughed with farmers and country merchants. They swapped yarns, cracked jokes and became jolly good fellows all. Finally, their hunger appeared, Mephisto and Marguerite arose and started a song.

"If you people don't mind my buttin' in, would you just wait a minute?" The unexpected remark came from the farmer who had come in with the food, and was waiting to take the empty baskets back over the white hills. He had been standing at the end of the car, deferentially waiting for his guests to get through. The travelers instantly divined, or thought they did, what he wanted, and began reaching into their pockets. The farmer shook his head.

"Tain't that," he said; "you're welcome to the grub; glad you liked it. But I was thinking being as you people sing, maybe you wouldn't mind givin' some folks out in the country a bit of a treat. That's people connected with this telephone in the car here what never saw a real show in all their lives—the sick people on that line that—"

"Nough said, my friend," said Mephisto, his eyes lighting up with the idea; "you get busy now calling up everybody on that line. This is Christmas Eve—maybe there's trees at some of the school houses—call 'em up if they have phones—don't leave anybody out." Then turning to the actors: "All you sweet singers of Is—Michigan walk up to the end of the car. Now, ladies and gentlemen, our good farmer friend has made connections with our country cousins; the curtain may rise!"

When the actors arose to obey, a lady with chestnut curls and blue eyes, who took the rather inconsequential part of Bessy, started to join them. Marguerite of the sun-kissed hair observed Bessy, and said, sweetly:

"He didn't call for the maids-in-waiting." The gentle Bessy, wounded to the quick, stepped back, the stately Marguerite sweeping by. It was mostly before the footlights that Marguerite's injured innocence and meekness glowed.

After a brief discussion of the selections to be given the performers removed the lid from their melody. As one finished he would step from the phone and the following would take his place. It was a fine performance, as all were old, experienced singers, and each did his level best.

When the singers had finished as much of the piece as it was practical to give over the wire there came a "Ting-a-ling-ling-ling!"

A singer stepped to the phone. "Is this the train where the sweet music comes from?" asked a girlish voice.

"Yes—this is the Faust Concert company you have been listening to." "I think it is perfectly lovely."

"Thank you, Miss. Will you give me your name so I can tell my comrades?"

"Cecil of the Woods" they call me. We live in a little cabin up the mountain side. Oh, it is so cold and desolate here, and no friends for the longest distance!"

"Dear me! That's too bad. I wish you were nearer so you might come and see us."

"So do I. Then I would sing for you."

Mephisto turned from the instrument, grinning.

"There's a kid girl back in the woods who thinks she can sing," he said to Faust and Marguerite. "I'm going to let her blow off—then you folks can hear, too. (Then putting his mouth to the phone.) I would be delighted to hear you. Can't you sing over the phone?"

"I—I—you won't laugh at me?" said the gentle voice, tremulously. "Sure not! Nobody will hear you but me."

"What shall it be—a Christmas carol?"

"Yes, yes—anything." Those watching Mephisto noticed his brows knit; then his eyes lighted up and an eager expression swept over his cadaverous face.

The song at the other end finished, Mephisto thus spoke to the singer:

"Little girl, I don't know you, but let me tell you you've got talent—oceans of it! I want you to sing that to a friend of mine, Miss Hastings, who plays Marguerite."

Marguerite, with a satirical smile, took Mephisto's place at the phone. Out of the depths of the snow floated the gentle voice of "Cecil of the Woods:"

"O'er the blue depths of Gallilee There comes a holler calm, And Sharon waves, in solemn praise, Her silent groves of palm.

"Glory to God! The sounding skies Loud with their anthems ring, Peace to the earth, good will to men, From Heaven's Eternal King!"

Welling out of the blackness of the night, from some unknown spot in that vast, mysterious wilderness, the tender, well-modulated voice struck deep into the heart of the woman of the stage. There were the signs of rain in her eyes as she released the receiver and turned to her companions.

"That girl is best where she is," said Marguerite, "but think what that voice would be with a little training." "Wouldn't it?" cried Mephisto, enthusiastically, again going to the phone. "That's a prize if we can get her." (In the instrument:) "Hello!"

"Yes, sir," replied the voice of Cecil of the Woods.

"How would you like to train to travel with a great opera company like ours?"

"Oh, sir—I fear you are laughing at me," with an expression of pain.

"Never more in earnest in my life," protested Mephisto. "We're snowbound for tonight and maybe all day tomorrow, but I will leave the address with one of the railroad men and means for you to meet us in the city during the holidays, and then we'll talk things over. You'll be playing Marguerite yourself inside of a year, and will be famous."

This terminated the interview, and Mephisto hunted up Jim the electrician, and instructed him about a further dispatch to the paper concerning his remarkable find. "By George!" he said, "Our Luck's with us in spite of this infernal snow. Who'd a thought of striking a prize song-bird in this bleak region—and while snow-bound, too! Facts beat fiction every time."

Jim went into the forward car to write up the newest developments of the snow-bound troupe, under the inspiration of a cigar furnished by Mephisto, who followed to suggest interesting details. As he passed into the car ahead Mephisto noticed Bessy of the chestnut hair curled up in a seat, "sound asleep." Nailed to the corner of the car near her was a telephone, the same as in the rear car. A horrible suspicion swept over the manager, and he glared about with glassy eyes. Seeing a brakeman snoozing in a seat, with his lantern beside him, Mephisto seized it and ran outside. Holding the light up near the corner of the car he observed a thread-like strand reaching from the ventilator off into the darkness.

Then he re-entered the car, and wearily walked up to where Jim was traveling with his press dispatch, saying: "Since thinking the thing the thing over, Jim, you needn't send off that last chapter. It's too good for them muckraking newspapers anyhow."

Advertising in China.

Tradesmen in China have quite as high appreciation of the value of advertising as any other people in the world. In China the biscuits bear the imprint of the baker, and ducks bought in the Celestial markets frequently show on their backs a big red stamp bearing the name of the seller. Chinese shops have large signboards which show an odd mixture of the poetic and the commercial traits of the people. Here are a few examples:

"Shop of Heaven-sent Luck," "Tea Shop of Celestial Principles," "The Nine Felicities Prolonged," "Mutton Chop of Morning Twilight," "The Ten Virtues All Complete," "Flowers Rise to the Milky Way."

A charcoal shop in Canton calls itself the "Fountain of Beauty," and a place for the sale of coal indulges in the title of "Heavenly Embroidery."

An old and wine establishment is the "Neighborhood of Chief Beauty," and "The Honest Pen Shop of Li" implies that some pen shops are not honest.—New York Sun.

A Sordid Husband.

"Where are you off to now?" "To my Shakespeare club, hubby."

"What good has your Shakespeare club done you?"

"Why, I have learned all about the plays."

"Bah!" snarled her husband. "I thought surely you'd get chummy with some woman who owned a big automobile."

THE SPEED OF THOUGHT.

How fast do impulses travel along the nerves? The speed has been duly measured by the aid of the elaborate apparatus with which the physiological laboratory of today is supplied. In man the rate has been set down at about 114 feet a second.

This measurement has reference to the rate at which messages of the bodily telegraph system are sent from nerve centers along motor nerves or those destined to bring muscles into play. But a second class of nerves exists in the body called "sensory," whose duty it is to convey messages from the body to nerve centers. The rate of impulse in the sensory nerves is quicker than in the motor nerves. Investigators give varying rates, from about 168 feet to 675 feet per second, an average rate being 282 feet.

Physiologists have made careful calculations regarding what is called our reaction time. Here we endeavor to calculate the interval which elapses between the impression made on our organ of sense and the giving of the signal which registers the impression as received by the brain and translated into terms of consciousness. Different results, due, no doubt, to the varying nervous capacities of the individuals, have been obtained. In one series the interval averaged .1087 of a second and in another .1911.

Signaling to the eye by means of a light demanded for its reception and demonstration .1139 of a second. In the case of a sound the interval was .1360. An electric spark used to stimulate the eye gave as reaction time .1377 of a second when the signal was given by the lower jaw and .840 when given by the foot.

TYPEWRITER VS. COAL HEAVER.

The girl who is operating a typewriter doesn't appear to be doing very heavy physical labor, as compared with the brawny individual in the stokehold of an Atlantic liner who is shoveling coal into a hungry furnace, but this is one of the many instances in which superficial appearances are deceptive, as a comparison of the force expended by the two will show. The stoker may be credited with handling one ton of coal per hour, or eight tons per day, plus the weight of his shovel. Adding the shovel to his 17,960 pounds of coal, he expends about 20,000 pounds of energy. For each key struck on the typewriter there is an expenditure of something over three ounces of energy, or, say, one pound to the average word. A fair operator will average 1,500 words an hour, or in eight hours 12,000 words—12,000 pounds of energy. To throw over the carriage for each new line requires on an average three pounds of force. Twelve thousand words will make 1,000 lines, so there are 3,000 pounds of energy to be added to the 12,000, making 15,000 pounds of energy expended—which compares pretty well with the stoker's 20,000, all things considered. A really fast operator would push the expenditure of energy in to 25,000 pounds or more.

DEATH LIST OF SOME WARS.

The total number of British killed in action in the South African war was 5,744; 22,829 were wounded, and 16,166 died of wounds or disease. The number of Boers killed or mortally wounded was about 3,700; about 32,000 prisoners of war were taken, 700 of whom died. The United States' loss in the war with Spain was 336 men killed, 125 mortally wounded, 5,277 died of disease. The Spanish loss was 30,000, the majority dying from disease. According to the report of the provost marshal general the casualties of the Union army from the beginning of the American Civil war to August, 1865, were as follows: Killed, 67,976; died of wounds, 25,947; disease, 188,464; disabled, 24,306. Confederate losses were: Killed, 51,525; wounded, 227,871. In the Union navy there were 4,030 killed and wounded in action, 2,532 died of disease, and 2,070 died from other causes. Japan, according to one computation, is said to have lost 167,400 in killed, wounded and captured in the Russo-Japanese war, while Russia's losses were computed to be 388,500 men.

THE LAST STRAW.

Few food cranks have carried their yearning after the simple life to such an extreme length as did one Roger Crab, who, in spite of his strange fare, saw a fair part of the seventeenth century. Up to his twentieth year he was normal-minded, then he turned vegetarian, and framed his apology: "Butchers are excluded from juries, but the receiver is worse than the thief, so the buyer is worse than the butcher." From the banning of meat he turned his attention to butter and cheese, and thought that he could live without them. He went even further, and banned all things edible, till at length he achieved the fine art of feeding upon dock leaves, grass and water, at a gross cost of about a penny a week.

A THIRSTY CITY.

Official statistics just published by the municipality of Munich, Bavaria, show that the city still holds the record for the per capita consumption of beer, the amount per head of the population last year being 70½ gallons; the average consumption per head of population in England is only 26 gallons. The Munich breweries produced last year 81,762,000 gallons of beer, of which 42,500,000 gallons were drunk in the city, while the rest was exported to other parts of Germany and abroad. This home consumption represented an increase of 2,310,000 gallons as compared with 1910.

Man Really Useful.

For certain equitable, continuous modes of life, there is nothing more than judgment necessary, and we study to attain nothing more; so we become unable to discern what extraordinary services each vulgar day requires of us; or, if we do discern them, we find abundance of excuses for not doing them. A judicious man is valuable to himself, but of little value for the general whole.—Goethe.

Good Qualities.

He alone is worthy of respect who knows what is of use to himself and others, and who labors to control his self-will. Each man has his own fortune in his hands; as the artist has a piece of rude matter, which he is to fashion to a certain shape. But the art of living rightly is like all arts; the capacity alone is born with us; it must be learned, and practiced with incessant care.

Something of a Curiosity.

Ruthie accompanied her mamma to prayer service, and during the service the hymn, "Cross and Crown," the first line of which reads, "The consecrated cross I'll bear," etc., was sung with much fervor by the congregation, when Ruthie considerably upset her mother's gravity by whispering excitedly: "Mamma, what does a cross-eyed bear look like?"

Moving Pictures Popular.

In a recent number of the Daily Consular Reports are collected memoranda from cities and towns in various distant parts of the world showing the universal quality of the popular interest which the moving pictures excite. England, Japan, Turkey, Mexico, India, Australia and the islands of the sea all have the same story to tell; wherever the cinematograph goes it finds an instant and sustained welcome.

Secret Lock.

If you have several small drawers in a bookcase or desk you can lock one of them in a manner most difficult to discover by boring a hole through the piece between two of the drawers and into the drawer. Fit a peg into this just tight enough not to slip down, and the drawer cannot be opened until the one above it is pulled entirely out to give access to the peg.

Only One More.

Senator La Follette, at a luncheon in Madison, listened with a rather weary smile to a magazine writer's exposure of the shameful means whereby a certain capitalist had amassed his fortune. "Oh, well," said the senator, "this is only another case of a profit without honor."

Mending Chairs.

To tighten joints in a chair when gluing the rungs in place, put a double rope about them and wind up the rope with a stick as tightly as possible, catching the stick under a rung to hold there until the glue has hardened.

Imagination's Limitations.

"If an actor imagines that he is a fat man he will appear fat to the spectators," a leading tragedian tells us. It may be so, but we have seen an actor who imagines he was a good actor and did not appear so to the spectators.

Tip Philosophy.

"Pink, I'm afraid you are wasting your time brushing my hat. I don't seem to have anything smaller than a \$10 bill." "I kin change dat all right, boss." "Then you don't need the tip. So long, Pink."—Chicago Tribune.

In Rebellion.

Mother—"Where are you going, boys?" Willie—"Over to the principal's house, mamma. We want to register a protest against tearing down the boys' croquet and fancy work room to use the space as a girls' basketball court.—Satire.

Merciful.

Mrs. Benham—"Do you remember that I gave you no decided answer the first time you proposed?" Benham—"I remember that you suspended sentence."—Judge.

Nothing Much to Do!

The conditions of conquest are always easy. We have but to toil awhile, endure awhile, believe always, and never turn back.—Semms.

Impatience.

Some people become discouraged because Opportunity doesn't respond whenever they whistle for it.

**Some Political
Possibilities**

A great deal of speculation is being indulged now as to what will happen if neither Taft, Roosevelt or Wilson should secure a majority in the electoral college at the November election. And some of the forecasts seem to show a possibility that, though this year's campaign is going to be a very short one between now and the first Tuesday in November, it may be a long time after that before we know who is going to be president—longer even than in the famous Hayes-Tilden contest, which was not decided until the very last days of February following the election of November, 1876.

Most of the thoughtful students of political condition admit the probability of Wilson's election. But they also agree that if Wilson is not elected, Roosevelt will carry so many republican states that Taft can not be, and the election will be thrown into the house. With twenty-two states having a democratic majority in their representation in the house and the same number having a republican majority, the chances for a deadlock appear to be good; and the fact that there are four more states with tied delegations that will be able to cast no vote, does not improve things a particle. Of course it is not probable that any republicans will vote for Wilson and thus elect him in the house—though it is possible that some of the Roosevelt members might do it to beat Taft.

But with so sharp a republican division as prevails, not only among the voters at large but also among the members of the house of representatives, it is impossible to believe that if the election goes to the house either Roosevelt or Taft can be successful. For that to happen, not only must some democrat be persuaded to vote for one of the republican candidates, but practically all the republicans must be united, and either every Roosevelt man must vote for Taft, or all the supporters of the president must side with the bull moose.

Under such conditions, for the election to go to the house would almost inevitably result in a deadlock. But with an election in the house, it has usually been assumed that an election of a vice president by the senate would be an easy matter; as, while the house has to select among the three highest candidates for president, the senate is limited to voting for the two highest in electing a vice president.

As Mr. Sherman, the present vice president, is now the Taft candidate for re-election to that office, and as a majority of the senate is republican, it would seem practically assured that if Mr. Sherman is one of the two highest candidates he would be elected vice president, and so become president. Before this can happen, though, Mr. Sherman must get the second highest vote for vice president in the electoral college, and it is by no means certain the Taft ticket will have more votes than the Bull Moose ticket—though we consider it highly probable.

Granted, though, that either Sherman and Marshall or Sherman and Johnson are to be the high men. Will Sherman then secure the vice presidency and in default of the election of a president by the house become president for the next four years? Instead of that being a certainty, it is not even a probability. For it takes 49 votes to make a majority of the full senate and elect a vice president. And the republicans of all classes and shades have only 50 altogether. This would be enough, it is true, with one to spare. But there are from three to a dozen republican senators who would not under any circumstances vote for Sherman—and there you are.

In the event—not only probable but well-nigh certain—that when the house fails to elect a president, the senate will be unable to elect a vice president, what is going to happen? Under the law for the presidential succession enacted shortly after the election of President Cleveland and Vice President Thurman, when the latter died, all the members of the cabinet in a prescribed line are made eligible to fill vacancies in the presidential office. Under this law the secretary of state comes first, and Mr. Philander C. Knox will be sworn in as president on the fourth of next March, if neither the house or the senate is able to agree on a president or a vice president.

Does this mean that Mr. Knox would be president for the coming four years? By no means. Under the same law he would have to call a special session of congress at once to provide for a presidential election next year, to fill the vacancy in the office of president. So far we have been in the realm not only of possibilities but dealing with things much more than possible. But when it comes to considering what parties there would be in a presidential election in 1913 or who would be the candidates then and what the probabilities of their election, it is too much like speculating about the modes of life on the satellites of Sirius.

What can be said is that the contingencies which we have been discussing, should they occur, would go a long ways

"SEE AMERICA FIRST" has been the tenor of the speeches made by several prominent men in various parts of the United States within the past month. People are beginning to realize that in this county, especially in the west, there is much beautiful scenery that rivals that of foreign countries. And what is most in its favor, it is near at hand. The great opportunity of seeing the west and a great deal of the world at the 1915 Fair, will prove a rare one to many people in the east who will see many sights on the one trip. Californians should begin preparations for the host of visitors that will come to all parts of the state. Make it more beautiful and attractive to induce visitors to become residents of our state.

THE BOOSTER SPIRIT so prevalent in this valley has broken out in another decisive epidemic in our neighbor town, the Gem City. Monday a bond proposition carrying some \$81,000 on several different projects was voted on at Los Gatos and carried by a big majority. The money will be spent on sewers, streets, new city hall and park improvements. Los Gatos citizens are wise and are building for the future, all shoulders to the wheel.

AREN'T you glad you didn't furnish any funds for the presidential campaigns in the past? Wouldn't you hate to be drawn into such a mess and squabble? No matter what you testified on the witness stand before the investigating committee, you would be considered a "liar" by a part of the people anyway. There are some pleasant things in not being rich. Many people think better of you.

WHAT with the numerous political, official and noted industrial embezzlers, grafters and scoundrels, is it much to be marvelled at that many men of lesser ability and fewer opportunities now and then break into a house and steal? That one commits a crime does not excuse another but very often the example has been set by the men higher up, the leaders of men.

THE voters of California are surely in a sorry plight this year as to what and what not to vote for. Numerous initiatives and amendments are before the people to decide on and the great majority of people are at sea as to what is best. Would that some Solomon, (that could be trusted) would put us wise. The public cannot glean it from the press.

Racetrack Gambling

By Franklin Hichborn

The persistency with which the beneficiaries of racetrack gambling insist upon doing what public sentiment declares they shall not do, is worthy a better cause.

Having lost in the legislature, having lost in the courts, the gamblers now attempt thru deception to get a ruling from The People that shall tie not only the hands of the courts, but of the Legislature also, and leave the gamblers free to do pretty much as they please.

Under the present law—which by their initiated measure they seek to nullify—resumption of racetrack gambling means that those responsible will go to jail.

Years-Long Fight
But the statute out-lawing racetrack gambling went on the statute books only after years of successful opposition on part of the gamblers.

The large cities first felt the pinch of the racetrack gambling evil. Both San Francisco and Los Angeles banished the evil from their borders.

At Los Angeles, the gamblers moved across the city boundary and resumed operations. Los Angeles thereupon extended her city limits to take them in. The gamblers moved again, only to be followed up by the extension of the city.

Established Emeryville

In northern California, the gamblers entrenched themselves in a municipality of their own at Emeryville Alameda county. Emeryville was a gamblers' town. Gamblers or their associates sat in the town council, similar characters served as Mayor, as marshal, as town clerk. They made the municipal laws, and enforced them to suit their own purposes.

There was but one way they could be reached—thru the State Legislature. And the gamblers so organized the Legislature that they were able to block anti-racetrack gambling legislation.

Senate Public Morals Committee

To this end, men in sympathy with racetrack gambling were placed on the State Senate Public Morals committee. From the origin of this committee in 1903, until 1911, when the state political machine was kicked out of control, Frank Leavitt, representing the Emeryville district, was a member of this committee, as was also Senator Wolfe, of San Francisco much of the time. Every bill dealing with a moral issue—and this

toward placing the United States of America in the class of unstable governments prevailing in Mexico and Central and South America. If in the election this fall no candidate receives a majority in the electoral college we shall soon be sailing on uncharted seas.—Woodburn (Ore.) Independent.

**Increasing the Fertility
of the Soil**

In this period of high and constantly rising cost of living no suggestion of relief has a more rational basis than that which looks to an increase of the fertility of the soil in food products. It is the feeding of our people that costs, and the great bulk of our food comes from the earth.

As we have been going on now for a good many years our population has increased in a vastly greater ratio than the

Apple Show

Watsonville.—Nineteen counties in the State already have signified their intention of exhibiting apples at the third California Apple Show to be held in Watsonville from October 7th to 12th and this exceeds last year's record by six counties, with prospects of several more entering before the Show opens. The counties that will exhibit apples at Watsonville this year are Santa Cruz, Monterey, San Benito, Santa Clara, San Luis Obispo, Sonoma, Mendocino, Humboldt, Nevada, El Dorado, Mono, Inyo, Riverside, Siskiyou, San Diego, Los Angeles, Tuolumne, Modoc and Butte. Humboldt County has appropriated the sum of \$1500 for its exhibit. Tuolumne has a fund of \$750, San Luis Obispo has \$350 and the other counties will be represented by attractive exhibits in neat booths. The arrangement of the exhibit space is such that no one particular exhibit will have any more advantageous location than the rest, some of the counties intend to install feature exhibits, Santa Clara, Monterey, Humboldt and Santa Cruz being in this class. Already eleven feature displays have been signed up and others will be entered within the next week.

Notice to Subscribers

A blue circle around this notice indicates that your subscription has expired and it is the hope of the editor that you will renew for another year. If we do not hear from you at once we will understand that you wish the paper continued. If you should see a blue cross thru this notice, that means that the Post Office forbids us sending the paper any longer without paying an increased rate of postage; therefore this is the last paper you will receive until accounts are squared up.
